

SHALLOW WELL PUMP W PRESSURE TANK & DIGITAL SWITCH

EJP SERIES

The REEFE Shallow Well Pump Series offers upgraded features to ensure the highest quality with exceptional self-priming capacity. These EJP's are 100% European made and are suited to those tough Australian farm water transfer and watering needs.

APPLICATIONS

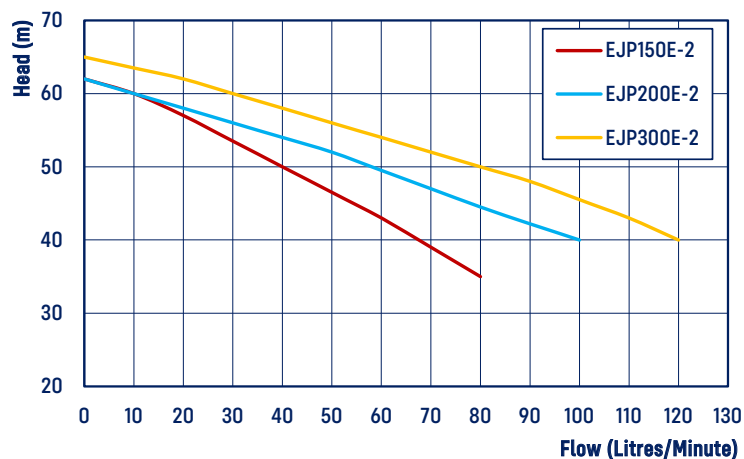

- Water transfer
- Irrigation
- Drawing from dams and streams
- Underground water tanks
- High demand suction lift

FEATURES & BENEFITS

- European made quality ensuring a lasting investment
- Suction lifts to 7m for greater versatility
- Self-priming, once water is present in the wet end, getting water where you need it faster
- Assembled with EPS digital pressure switch with run dry protection

CONSTRUCTION

- Cast Iron pump casing and motor flange and inlet
- Venturi tube in Noryl
- Impellers made of brass
- Stainless steel motor shaft
- Ceramic / Graphite mechanical seal
- Supplied with 18L Pressure Tank, EPS1 Pressure Switch & outlet
- 18L pressure tank with heavy duty butyl diaphragm and stainless threaded inlet
- Ingress Protection IP54
- Insulation Class F
