

TURBINE PRESSURE PUMP

DT SERIES

This economical WaterPro turbine pressure pump is designed for water transfer and garden use. Robust construction, with stainless steel shaft, brass impeller, and carbon/ceramic mechanical seal. Includes automatic pressure controller.

APPLICATIONS

- Garden water supply
- Water storage tank pump set
- Water transfer

SUITABLE FOR

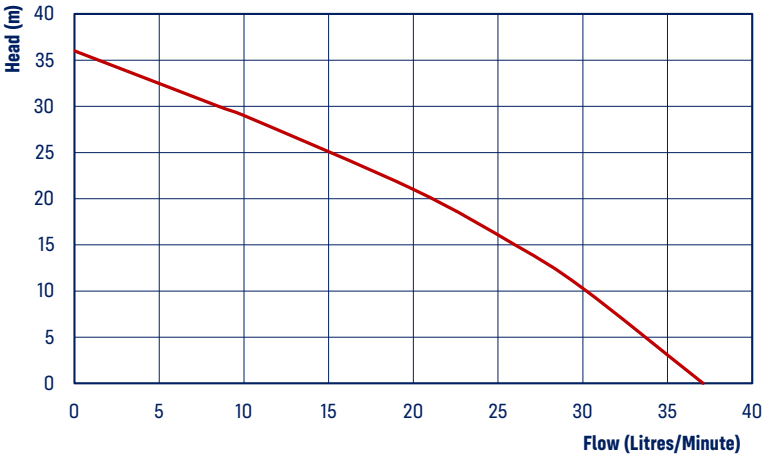

- Supplying water to the garden
- Ideally suited for 1 to 2 garden taps

FEATURES & BENEFITS

- New stainless steel impeller facings to prevent binding
- Reliable, efficient performance
- Automatic pressure controller giving consistent pressure supply
- Run dry protection

CONSTRUCTION

- Brass impeller
- Cast iron impeller housing
- Brass barrel union with o-ring seals
- Stainless steel motor & pump shaft
- Carbon/ceramic mechanical seal
- Quick plug pressure controller
- Ingress Protection IP44
- Insulation Class B
